NC: no completion
C: completion
C$_d$: discrete
$\kappa = 0$
$\kappa > 0$
Permanent $t = 0$
(a) Attainable accuracy
(b) Pair collapse
(c) Reaching $t = 0$
Relative H^1 error
Gradient tolerance g
Half-gap h_k (NC)
L-BFGS-B iteration
Squared half-gap t_k (C)
L-BFGS-B iteration
